

Taylor Morgan

Mid-Level Software Engineer | Full-Stack TypeScript, React, Node.js

Toronto, ON | taylor.morgan@example.com | 555-0147 | [linkedin.com/in/taylormorgan](https://www.linkedin.com/in/taylormorgan) | github.com/taylormorgan

PROFESSIONAL SUMMARY

Full-stack software engineer with 5 years of experience building customer-facing SaaS products, internal operations tools, and data-backed workflows. Strong in TypeScript, React, Node.js, PostgreSQL, REST APIs, and cloud deployment. Known for improving product reliability, collaborating closely with designers and product managers, and translating ambiguous requirements into maintainable features.

CORE SKILLS

Languages	TypeScript, JavaScript, Python, SQL, HTML, CSS
Frontend	React, Next.js, Tailwind CSS, accessibility, component testing
Backend	Node.js, Express, REST APIs, authentication, background jobs
Data	PostgreSQL, Prisma, Redis, analytics events, data validation with Zod
Cloud And DevOps	AWS, Docker, GitHub Actions, CI/CD, observability, Sentry
Collaboration	Agile delivery, code review, technical documentation, mentoring interns

PROFESSIONAL EXPERIENCE

Software Engineer - Northstar Analytics

Toronto, ON | March 2022 - Present

- Built React and Next.js dashboards used by 1,200 weekly active operations users, reducing manual report preparation by 8 hours per team each week.
- Designed Node.js API endpoints with PostgreSQL and Prisma, improving median page load time from 2.4 seconds to 1.1 seconds.
- Added role-based access controls, audit logs, and Zod request validation for customer account workflows.
- Created reusable form and table components with accessible keyboard behavior and unit tests in Vitest.
- Partnered with product and design to ship a self-serve workflow builder from discovery through production launch.

Junior Software Developer - BrightCart Commerce

Remote | June 2019 - February 2022

- Implemented checkout improvements in React and Express that increased successful payment completion by 6 percent.
- Maintained REST integrations with Stripe, Shopify, and internal inventory services.
- Wrote automated tests for cart pricing, promotions, and tax calculation edge cases.
- Improved deployment confidence by adding GitHub Actions checks for linting, tests, and database migrations.

SELECTED PROJECTS

Resume Matching Prototype - Built a TypeScript prototype that compares extracted resume skills against normalized job requirements and explains matched and missing skills.

Support Triage Automation - Created a Python script and dashboard that grouped support tickets by product area and surfaced weekly defect trends.

EDUCATION

Bachelor of Computer Science - University of Waterloo, 2019

CERTIFICATIONS AND LEARNING

AWS Cloud Practitioner, 2023

Frontend Masters: TypeScript and React Performance, 2024
